

TAKE ACTION in FIVE STEPS!

Are you ready to take positive action for animals, people and the planet?
Join the Kids for Positive Change Team! **Let's Go!**

Take Action in Five Steps

Using your student research document

Step 1: Discover why animals are important, what problems they are facing and positive solutions!

Step 2: Ask yourself: What animal would I like to research?

Step 3: Choose an animal to research from your student research document.

- Use the research page and website link provided to research your animal.
- Record your research on the worksheets provided.

Step 4: Use the research you recorded, on your worksheets, to complete your take action project(s).

Step 5: Share with your family, friends, school and community!

Protecting animal species helps fight Climate Change because protections include:

- Habitat Restoration
- Saving Forests
- Cleaning the Ocean
